SACRAMENTO, FRIDAY MORNING, JANUARY 11, 1889.

## To buy in this unparalleled week of half-value prices is not a payment but an investment.

OUR MARVELOUS BUSINESS IS SIMPLY due to the fact that we are selling precisely what we advertise, and fulfilling every word we say. The simple statement now is, that in our present offerings sixty cents will buy a dollar's worth of staple, seasonable goods, while broken lines, remnants, etc., are marked at half, third or quarter of the original prices.

### TO-DAY!

A continuance of the sale of Specials advertised yesterday; many of the lines being large, good picking remains.

### ADDED! ADDED!

CALIFORNIA LEGISLATURE.

SENATE

SACRAMENTO, January 10, 1889.

Senate met at 11 A. M., pursuant to adjournment. President pro tem. White in the chair. Roll called and all the members present, except Senators Barks, Murphy and Spellacy. Prayer by the Chaplain, Rev. A. C. Bane. Journal of yesterday read and approved. E. E. Leake, Chief Clerk of the Assembly, appeared and presented the first message from the Assembly, announcing the organization of that body, and giving a list of the officers.

THE GOVERNOR'S MESSAGE.

The Governor's biennial message was then taken up, and the Secretary proceeded with its reading.

After the reading had proceeded for some time, Mr. Heacock moved that the further reading of the message be dispensed with, and the motion prevailed.

[Senator Yell in the chair.]

The Assembly message was read.

Mr. Heacock offered a resolution directing the Secretary to request the Secretary of State to provide Senators with copies of the latest edition of the Codes, to be returned at the end of the session.

the session.

Mr. Bowers moved to amend the resolution by striking out the portion requiring the members to return the copies to the Secretary of State. In support of his motion he said that twenty members of this Senate would hold over for the next session and ought to have the Codes to take home with them. There were plenty of the Codes on the shelves of the Secretary of State getting covered up with the dust of ages and they might as well be in use. The whole expense would not amount to as much as one hour's pay of the army of attaches. He thought the Senate's economy was commencing at the wrong end.

The amendment was adopted by a vote of 20 syes to 13 noes.

Mr. Moffitt offered a resolution that the introduction of bills and resolutions be now in order.

Mr. Wilson thought the rules ought to be adopted before any bills were introduced.

Mr. Moffitt withdrew his resolution, and on motion of Mr. Caminetti the Senate took a recess until 1:30 p. M.

Afternoon Session The Senate reassembled at 1:30 P. M., Presiden pro tem. White in the chair.

THE STANDING RULES. Mr. Caminetti offered the following resolution: Resolved, That the rules hereto annexed be and they are hereby adopted as the standing rules of the Senate, twenty-eighth session.

Mr. Caminetti—I would state that the only changes made in the rules as they existed at the last session are that the hour of meeting on Monday is set at 2 P. M., instead of 2:30 P. M., giving a halt hour more for working purposes Another change is made in relation to the appointment of committees by the President of this body instead of by the Senate, as at the last session provided. Another change is in relation to the Committee on Contingent Expenses; that whenever any motion is made for the creation of any new office or any expenditure of money, the resolution shall be referred to that

creation of any new office or any expenditure of money, the resolution shall be referred to that committee without debate.

Mr. Frazer called for the reading of the rules. At the suggestion of Mr. Bowers, it was decided to read only Rules 1, 17 and 20, the three amended as above.

Mr. Britt offered a resolution appointing Daniel Wheelan as messenger to the Sergeantat-Arms, at a per diem of \$3.

Mr. Heacock moved that it be referred to the Committee on Contingent Expenses when appointed. Committee on Contingent Expenses when appointed.

Mr. Moffitt raised the point of order that the Senate did not yet know that there would be a Committee on Contingent Expenses. The point of order was sustained.

Mr. Heacock moved that the resolution be laid on the table temporarily.

The motion was lost, and the resolution adopted by a vote of 22 to 11.

The rules, as presented by Mr. Caminetti, were adopted without opposition. Rule 1 fixes the hour for meeting at 11 A. M.; recess from 12:30 to 2 P. M.; on Mondays meeting at 2 P. M.

Mr. McComms offered a resolution calling for Mr. McComas offered a resolution calling for the printing of 100 copies of the Constitution in pamphlet form. He was afterwards appointed ttee of one to wait on the Secretary o

INTRODUCTION OF BILLS. The President pro tem. stated that he had a bill covering the suggestion in the Governor's message in regard to the payment of the expenses of the funeral of the late Governor Bartlett, and it seemed to him that that bill ought to be introduced first, and read a first time without reference.
On motion of Mr. Goucher the bill was introduced and read a first time. It appropriates \$3,360 32 for the funeral expenses of the late Governor Bartlett, and directs the Controller to draw his warrant for that sum in favor of Wm. D. English and A. P. Williams.

Mr. Jones moved that the roll be called, and each Senstor allowed to send up each bills are called.

Mr. Yell, whose name is last on the roll, objected, but withdrew his objection, when Senator Boggs announced that he would waive his tor Boggs announced that he would waive his ight in Mr. Yell's favor.

LEGISLATIVE NOTES.

Dr. G. M. Dixon, Chairman of the Committee of Twenty-one, appointed by the meeting of representatives of the various counties interested in the drainage of the Sacramento valley and the improvement of the navigation of the Sacramento river, prepared the bill introduced by Senator Dray yesterday, entitled "An Act to provide for the appointment of a state Board of Drainage Commissioners, to define their duties, to provide for the organization of drainage districts and for the construction of works to improve the drainage of the several districts, and to appropriate money for the use of the Board of Drainage Commissioners." The bill contains fifty-seven sections and is very carefully drawn. It provides for the appointment by the Governor of a Board of Drainage Commissioners, consisting of three members, to hold office for two years or until their successors are appointed. The bill appropriates a sum of \$20,000 for the use of the Commission for the first two years.

Assemblyman Dobbins of San Francisco will shortly introduce a bill designed to increase the scope and efficiency of the Bureau of Labor Statistics. It will provide that the Commissioner shall have power to send for persons and papers, examine witnesses under oath, and to have free access to workshops and business establishments. If for a time it parstated. took of the character of undue stimulation, the reaction was but an incident, and will not have lasting effect upon the adwell to group a great number of prisoners. It may well be considered for instance, vancement of that section.

The State is an empire of territory, it will remain such, and indivisible in the sentiment of its people. The conformation of California makes all her longitudinal distances between bounds very great, and consequently uneconomic in certain matters of government. The political seat of of the State is central, and cannot be improved in that respect, and is accessible with about equal convenience from the north and south. But in the location of other State institutions it is as unwise and unjust to group them all in the central portion as it would be to place them all in the extreme north or the extreme south, or in one county. To lessen the cost of ifornia, and a population of less than 2,transportation of prisoners from the several parts of the State to the State prisons it is essential that the next prison built prisons, one upon the far south at shall be located in the South. NATURE OF THE WRECK.

The work of rescue was greatly retarded from the singular manner in which the silk mill collapsed. It did not fall, but was bodily crushed down, turning in upon itself in one mass. Not a vestige of the walls remain standing above the stone foundation. The rafters and timbers of the flooring project in all directions. As the building was steam heated, the ruins did not take fire, otherwise not one of the unfortunates could possibly have escaped death in a most appalling form.

Teams of every description—omnibuses, funeral coaches, fire wagons, bospital vans and private vehicles—were pressed into service, and were running rapidly to and from the scene of the disaster all night, bearing the bodies of the wounded, dying or dead to their homes or the hospitals. only in the matter of original cost in excess and guarding the new prison as already hospitals.

THE WORK OF RESCUE.

The work of searching for the dead continued all of to-day, and the scenes currounding the mill were but a repetition of what ensued dur-ing the whole of last night. There were father and mothers waiting and beseeching the res cuers to give them some tidings of their missing sons or daughters. It has been determined to push the work of rescue all of to night.

THE PITTSBURG HORROR. Upward of Twenty Victims of the Dia-PITTSBURG, January 10th.—The search for the victims in the ruins wrought by yes erday's storm was prosecuted all night, and will be vigorously continued until the debris is cleared away. This will probably take several days, and the exact number of victims will not be known until the work is completed.

There are all kinds of rumors in regard to the number still in the ruins. One of the men working on the building yesterday said that he was certain there were at least twelve more. This is believed to be too high, and that eight are still buried in the debris. There is no hope of anyone now in the ruins being alive, so that it is saie to say that the death list will exceed a score. mond Street Disaster.

SCENES AT THE MORGUE The Morgue was beseiged with callers all day. "Drop-a-Nickel" Insurance.

The drop-a-nickel-in-the-slot insurance plan has caught Wall-street men rather heavily. They insure their lives for twenty-four hours with a five-cent piece with as much regularity as they have their boots blacked. It insures \$500 to their heirs in case they are smashed in an elevated train going up-town, and gives them a subject to talk about at dinner. To a layman it is difficult to see where the profit comes in, for the cost of the tickets must be very large, to say nothing of the whole expense of running the machines. It would be interesting to know whether the company could be held legally to the payment of the promised fund in case a man was killed who had invested a nickel in the enterprise .- New York Sun.

MORE ABOUT COUPONS.

Judge H. O. Beatty Makes Some Sugges tions Regarding Them. EDS. RECORD-UNION: This morning Mr. Porter called on me and stated that the Bee's report of what he had said before the Board of Trustees last Monday was not at

all correct in many respects. If Mr. Porter have said, then of course those strictures him and myself last week, but as I only have the Bee's report of the Mayor's remarks, I think it quite likely they may be as incorrect as their version of Mr. Porter's.

Indeed, I have long since ceased to expect

anything that the Bee says about myself or the Fund Commissioners to be correct. I will now endeavor to state some things of I first showed to the Mayor that \$72,186 of the coupons of 1861 were not pasted in the coupon book; that in the regular

pay them if they did turn up, and not to keep back money in the Treasury to pay

To this request he made answer that he did not know whether the missing coupons of 1861 ever had been paid; that he would not act on the matter unless I brought him

coupons in 1861 amounted to a fraction under \$85,000. The whole amount of coupons for that year was only 85,500 and some odd into this State several years ago; it is a greater area than the United States, and extends through thousands of miles of latitude. Southern Alaska is not dissimilar in dollars. So here was what I supposed to be the Mayor's record evidence of the payment of at least \$71,000 of the \$72,000 miss-

Mayor thinking that with this record he would no longer hesitate to act. But 1 found him altogether indisposed to take are further action in the matter. This convinced me he was evading the whole question and jeopardizing the city's interest. This brought on some words between the Mayor and myself, and I started to leave the office and he requested me to come back. I returned; he took down in his own hand-writing the abstract from the Auditor's book, and said he would compare it with the book and take action on the matter. I left the office perfectly satisfied that the Mayor would act and that the city would be protected from any loss by reason of these '61 coupons. But it seems some influence was brought to induce the Mayor to change his mind. I think I myself may have contributed towards this change. Thinking that the Mayor had concluded to do something for the interests of the city I determined to make an effort

to get him to do a little more. city from these 1861 coupons, one to di-rect the Auditor to procure a proper stamp and stamp the date of payment on all cou-pons paid in the future; third, an order to make Mr. Gerber pay out the money (about \$70,000), belonging to the sinking fund, which he now holds in the Treasury. I handed these to the Mayor a day or two after the first interview mentioned, and asked him to consider them before the Trustees terwards it is an easy matter to graft or

The first proposition was a very simple one, to protect the people against the possible, if not probable, second presentation of the '61 coupons, and to prevent Mr. Gerber from having any pretext for holding back \$72,000, to see if he might not have to pay them in case they were presented. The second one, about dating cancellation, was something the Mayor himself suggested should be done. I merely put it

The third one was precisely such an order as the Bond Commissioners persuaded the Trustees to make in the fall of 1887, under precisely similar circumstances. But that we should ask him a second time to make the Treasurer pay out the money where it belongs seems to have greatly astonished the Mayor. In another article I will try and explain how and why Mr. Gerber keeps \$70,000 tied up in the unterest and the superior Court of the County of Sacramento, State of California, Hon. W. C. Van Fleet, Judge.—It is ordered by the Court that one hundred grand jurors and five hundred grand jurors and five hundred as the estimated number of grand and trial jurors, respectively, that will, in the opinion of the Superior Court of the County of Sacramento, State of California, Hon. Attest: WM. B. Hamilton, County Clerk. and explain how and why Mr. Gerber keeps \$70,000 tied up in the interest and sinking fund, a large portion of which rightfully belongs to the Fund Commissioners, and would now, if Mr. Gerber would pay it over, be invested in city bonds and Bridges.

CULTIVATING THE OLIVE. A New Industry That is Rapidly Coming

The state of the s

to the Front. B. M. Lelong, Secretary of the State Board of Horticulture, is the author of a the State Printer entitled: "The Olive in New Methods and General Observations." It is illustrated by fourteen handsome expressly to illustrate this work. He says:

"The olive is now more prominently before the people of Calitornia than any other
tree. The merits of the varieties most
largely planted have been widely discussed
through the columns of the press. Only
two varieties have received attention, this being due to the fact that very little has been known of other introduced varieties that have recently come into bearing. I have, within the past year, given this mat-ter a great deal of attention, and have spared no pains in investigating anything in the olive line that has been made known to me." He gives illustrations and de-scribes the following varieties: Picholine, Saillern, Rouget Verdale, Olivere, Lucques, Pigale, Pendoutier, Manzanillo, Macrocarpa, Rubra, Uvaria, Atro-vialacia, Pendulina, Columella, Mission and Redding Picholine.

At Vacaville the Pendoutier variety is growing in the orchard of A. Montpellier. Mr. Montpellier imported his trees from Italy in 1885. They have been planted three years; one of the trees bore fruit for the first time last year. This year all bore fruit (five trees) excepting one that has not received any irrigation. Since the trees were planted they have received very good care—they have all been irrigated excepting one; this non-irrigated tree receiving the same treatment, has made fair growth, but is not one-tenth the size of the other trees, and from present indications it will be several years before it will bear. The fruit ripened in the first part of October.

At Sonoma this variety is growing in the orchard of L. P. Rixford. Mr. Rixford inverted his tree from France contents.

It is a volume of 672 pages. Small towns throughout The Redding Picholine was introduced snow. They do not imagine that it has a complaining of an ingenious soap swindle which is being worked. Female agents claiming to be from Chicago, canvas a houses, leaving a cake of soap as sample. They return and ask the lady to sign a printed "testimonial," the same to be presented to the grocers, to influence the latter to handle the trade. The testimonials afterwards turn up as "orders," calling for soap in various quantities at fancy prices. The wording of the so-called "testimonial" is very

AN ASTONISHING CHANGE.

"My dear madam, I never saw you looking so well, and you were so poorly, too." "Yes, doctor, Joy's Vegetable Sarsaparilla is the grandest thing in the world for run-down nervous and debilitated women. That's the secret of my appearance."

Up to a month ago Mrs. Belden, an elderly lady, hiving at 510 Mason street, San Francisco was failing in bealth and flesh so rapidly as to seriously alarm her relavives. She now writes: "I have taken but one bottle of Joy's Vegetable Sarsaparilla, but it is astonishing. I am regaining my lost flesh and have not felt as well in years."

# WHY OUR CLOTHING LEADS

The advantages we offer to Clothing buyers are telling and important. They arise in part from our ability to get the best the country affords, and from the determination to so suit customers as to have their trade permanently.

One of the first questions which buyers ask about clothing is, "How will it wear?" The point is a vital one. Much hinges upon it. Clothing that falls short in quality is costly at any price. It is true it is hard oft-times to detect poor clothing. When new it is likely to be so ironed and pressed into shape as to look better than it really is. How is the buyer to know how it will wear and keep shape after the first newness has worn off? How is he to tell whether, like a well-built house, it is thoroughly stayed in those parts which are closed to the eye? He can't, except by buying and wearing. With most people clothing is too costly an item of dress to experiment

Unlike most dealers, we have nearly all our clothing made to order. We pick out our manufacturers. We pick out our cloth. We say how this kind of a suit is to be made, and how that. If, when the coats, pants, or whatever they may be, are done, they are not up to the standard of excellence, back they go to the makers. People look to us for the best goods, and we cannot afford to keep anything else.

In point of price our clothing will be found, quality considered, always as low, and in most cases lower, than that of other dealers.

In point of style and fit it ranks second to none, many of the leading manufacturers of the country being engaged upon our work.

This season our stock of all kinds of clothing is unusually large, and we are sure it will pay anyone in need of goods in this line to see what we have.

Coal Mine on Fire-Prospectors Drowned-Death of a Son of Old John Brown.

[SPECIAL DISPATCHES TO THE RECORD-UNION.]

AT THE BAY. One More Unfortunate-A Major's Stripes

Going Begging-Etc. SAN FRANCISCO, January 10th.—A warrant was sworn out to-day for the arrest of Peter G. Stewart, formerly a fireman on the steamer Zealandia, on a charge of being a common drunkard. This afternoon he was found dead in his room on Second street, he having some time before cut his throat.

his throat.

The election of Major of the Second Regiment of Artillery, which was to have been held this evening, was postponed, because no one was found willing to accept the position.

George A. Knight said this evening that the report of the trouble he had with Governor Waterman was based upon a statement made to the Governor that he had failed in his professional duties on behalf of J. Stacht, in applying for a pardon. It is not true that he said that in that matter he did all the law required him to do.

A COAL MINE ON FIRE.

Seattle, the Center of a Coal Section, Threatened With a Coal Famine. SEATTLE, January 10th.—All the miners are driven out of the mines at the Black Diamond mine by a fire caused by waste coal left in a breast, which caught spontaneously and soon got beyond control. The miners left the shaft to-day at noon, and the mine is now left almost entirely to the flames.

The Franklin mine is also trappled with for entirely to the flames.

The Franklin mine is also troubled with fire, and at Newcastle the two labor factions are fighting, so that the supply of coal is shut almost completely off.

Nine carloads of Gilman coal arrived to-day and was sold off in three hours. Seattle, though surrounded with coal mines, is threatened with a coal famine.

Interview with Messrs. Crocker and Towne—The Union Pacific.

San Francisco, January 10th.—Colonel Crocker stated to-day that Chief Arthur had not yet cafled on the company, but has no doubt about an amicable settlement of the difficulty that Arthur is here to investigate.

A. N. Towne said that no demand had been made on the company to dismiss Ryan, the Master Mechanic of the Atlantic Division.

On the subject of the Union Pacific building into California, Colonel Crocker said: "I can hardly see why the Union Pacific building into California, Colonel Crocker said: "I can hardly see why the Union Pacific building into California, Colonel Crocker said: "I can hardly see why the Union Pacific building into Hardly of Italian was ago, and the Lewistown Journal thus to build in here. It has its own territory to develop, and is now paralleled by the Burlington and by the Chicago and Northwestern. I should think it had sufficient to do to look after its own property, without attempting to parallel the Central Pacific. Our Directors have never had any conference with the Directors of the Union Pacific on this subject, nor have we been formally apprised that they have any such extensive extension schemes under consideration. The relations between the two roads have never been closer than at present. In the new General Manager of the Union Pacific, Mr. Heleombe, and in his assistant, Mr. Melton, we have ever confidence. Mr. Melton conferred with us a short time ago in reference to some plan for further facilitating traffic arrangements between the two companies. There existing no dissatisfaction on that score, I can hardly ascribe any reason for their action. Persons from the Harqua Hala Mines Confirm the Glowing Reports. PHENIX, January 10th,—Nellie Cashman, of mining fame, has arrived from the Harqua Hala mines, and after purchasing supplies will return. She declares them the finest mines that she has ever seen in all her experience. The strike made by Walton Stein and Sullivan is the absorbing theme of conversation. An expert miner there, writing to the Herald of this city, says: ity, says:
"The principal veins of rich gold are or a

ed, rosy and iron-stained character, in many places wholly decomposed. The quartz is very tively in character, and seems to cross a very strong ledge of lime and quartzite that is perhaps 400 to 600 feet wide and extends across the country of the decision of the country of the decision of the country of t country fifteen or twenty miles. The dyke is walled by porphyry and shale of a character much like slate.

"Lying in the dyke are a number of veins or deposits of sand carbonates that, so far as tested, give \$40 to \$50 each in gold and sliver. Some tests are reported to run as high as \$2,000 of the carbonates. Of the quartz veins, assays run from \$300 to several thousands; in fact, many sacks of quartz are full of free gold, and many pieces of rock and nuggets beyond question are so great in percentage of the yellow metal that ordinary assays would not be the correct thing, but rather by the Mint, system of

Excitement Over the Chloride Mines Near Lake Pen d'Oceille. SPOKANE FALLS, January 10th .- The excit-SPOKANE FALLS, January 10th.—The excitement among miners over the chloride mines, near Lake Pen d'Oreille, continues. Though there is a heavy snow on the ground there are hundreds of miners going there. It is claimed that 100,000 tons of ore are iu sight. Assays taken by purchasers across a forty-foot ledge show an average of over thirty-two ounces, free milling, without touching the richer streaks, that run as high as 300 ounces and over. There is ample water-power, and transportation is only three miles distant.

BRITISH COLUMBIA.

Not Seriously Credited. VICTORIA, January 10th.—Hon. John Robson, rovincial Secretary, was interviewed regarding he report that Mong Kow, the Chinese agent of the Canadian Steamship Company, is no v at Ottawa scheming for the immigration of a million Chinese, and endeavoring to secure a reduction of the Chinese head-tax as one part of the plan. He states the Provincial Government lutely no knowledge on the subject. He cheme, as such a large influx of Chinese would be highly detrimental to Canadian interests, und believes the Dominion Government would ook upon it as bostile to the United States. The Provincial Government would strongly oppose the scheme. The report is not credited here. A dispatch from Ottawa says Mong Kow left for Victoria last night. School Examinations. It cannot be too often insisted on tha examination is a good educational servant out a bad master. It is a useful instrument n the hand of a teacher to test his own ork, and to know how far his pupils have followed and profited by his teaching. But it necessarily exerts a fatal influence whenever it is made of such importance that teachers simply conform to an external standard, lose faith in themselves, sink into the position of their own text-books and give but little of their own personality to their work. It is true that it is neces sary to test the work of teachers, but it is not necessary, for the purpose of doing so to take the whole soul out of teaching. If examinations are to be defended on the ground that they test the efficiency of the teacher, then we reply that other and better ways of doing this are to be found, and must be found. We admit quite frankly that they can only be found and pursued at the price of some trouble and experiment on the part of both of parents and those responsible for the conduct of teaching; but if trouble and thought and experiment are to be spared in this great natter, we had better at once resign the hope of attaining any moral and intellectual results of real value from what we are doing.—Popular Science Monthly.

[SPECIAL DISPATCHES TO THE RECORD-UNION.] THE WOOL INDUSTRY.

Important Action Taken by the National Wool-Growers' Body.

Washington, January 10th.—The National Wool-growers' Association met in Convention to-day. Officers were elected as follows: President, Hon. John McDowell, of Washington, Pa.; Vice-President, Colonel William Black, of Texas; Treasurer, I. H. Wallace, of Missouri, and Secretary, J. H. Kirkpatrick, of California.

Resolutions were adopted declaring that, while Congress maintains a general policy or protection, the wool-growers and wool-manufacturers in the United States have a right to demand that the duties on wool or woolen and worsted goods shall be adjusted and maintained so as to secure to them the American market. They protest against the Senate tariff bill so far as it effects wool provide for a committee of seven to formulate such a schedule of tariff duties for wool as may be deemed just and necessary, and to present the same to the Finance Committee of the Senate and urge its adoption.

They further declare that the determination of an economic and financial policy for this Government is so important to the wool-growing and all other industries of the nation as to require immediate and definite legislation, and if this shall not be accomplished during the present Congress, an early extra session of the Fifty-first is recommended. A Hint to the Ladies.

A lady entered a drug store in Broadway yesterday and ealled for this mixture: One quart of deodorized benzine, one dram of sulphuric ether, one dram of chloroform, two drams of alcohol, and just enough cologne to make it pleasant. When she had gone the clerk remarked to a spectator:

"Do you know what she wanted that preparation for? You would not be far out of the way if you guessed that she was going to wash some soiled gloves. That is one of the best and cheapest preparations for cleansing that I know of. You pour a little of the mixture into a clean bowl, and wash the gloves in it as you would wash anything with soap and water. When the dirt is about remeved rinse the gloves in some clean fluid. Usually one rinsing is enough, but if the gloves are very much soiled rinse a second time. If the gloves are of a cheap kind, it is best to dry them on the hand, but a fine glove, after having been rubbed with a soft cloth, to smooth out the wrinkles, may be hung on a line to dry like any ordinary garment.
